SKILLS

- HTML 90%
- CSS/TailwindCSS 80%
- Git/Github 70%
- React 75%
- Next.js 65%
- Node.js 70%

WORK EXPERIENCE

Front-End Developer

Worked on several personal and collaborative frontend projects, focusing on building responsive and interactive web interfaces. I use HTML, CSS, JavaScript, React, and Next.js to turn designs into functional applications. I have also taken part in collaborations with other developers, contributing to shared codebases and team projects. My work is version-controlled on GitHub, where I regularly push updates and improvements. With less than one year of coding experience, I've learned mainly through building real projects and solving problems. For more of my work, please check out my portfolio website via the web link in the contact section.

EDUCATION

September 2019 - July 2025

Restoration High School

Completed secondary education with strong academic performance, achieving an excellent WAEC result of 9 As and 1 B, and scoring 344 in the JAMB examination. These results reflect a solid foundation in analytical thinking, problem-solving, and discipline. I am currently preparing to begin my tertiary education, pursuing a BSc in Computer Science at Modibbo Adama University, Yola, Nigeria, where I aim to further develop my technical skills and academic knowledge.

SpiritLife Model

Obtained my First School Leaving Certificate from Spiritlife Model School International. This stage of my education helped build a strong academic foundation, discipline, and interest in learning.
